Pnmnoraw User Manual

pnmnoraw

Updated: March 2000

NAME

pnmnoraw - replaced by pnmtoplainpnm

DESCRIPTION

This program is part of Netpbm.

pnmnoraw was replaced in Netpbm 8.2 (March 2000) by **pnmtoplainpnm**, which was obsoleted by **pnmtopnm** in Netpbm 10.23 (July 2004).

pnmtoplainpnm was actually the same program; it was just renamed to make it clear that is just a format converter.

pnmtopnm is more general, in that it can go both directions. **pnmtopnm -plain** is the same as **pnmnoraw**.
